

REMARKS

Prior to examination of the above claims please enter the following supplemental amendment. Applicant has amended claims 49-76 in response to discussions with the examiner in which the examiner stated that audio and/or video along with related metadata being transmitted from a remote computer to a client computer was not present in the cited references.

Summary

Applicants have amended the above claims pursuant to discussions with the examiner. Accordingly, amendments to the claims for patentability purposes, the reasons therefore, and arguments in support of the patentability of the pending claim set are presented above. Any claim amendments that are not specifically discussed in the above remarks are not made for patentability purposes, and the claims would satisfy the statutory requirements for patentability without the entry of such amendments. In addition, such amendments do not narrow the scope of the claims. Rather, these amendments have only been made to increase claim readability, to improve grammar, and to reduce the time and effort required of those in the art to clearly understand the scope of the claim language. In light of the above amendments and remarks, reconsideration and withdrawal of the outstanding rejections is specifically requested. If the Examiner has any questions, which may be answered by telephone, he is invited to call the undersigned directly.

Respectfully submitted,

Dated: 12/1/2003
